Body is extended perfect balance centred on skis rotation stopped	Slight over/under rot. good absorption and balanced body position weight on both skis, No touch	Over/under rotated hard absorption slightly off axis. Possible small touch with hands				Way to long/short, hard hand touch / dragging hands / front roll	Way way long/short insufficient absorption back slap / front roll touch down	So far over/under rotated that there is minimal weight on skis, major snow contact	Complete fall no weight on ski at all
